

Vision

- Android app for networking events like Expo
 - Connect with recruiters and easily share information
 - Applicants can create simple resumes and share with NFC
 - Companies can send information back through NFC
 - All users can reformat, organize, and sort resumes
-
- Closest competing apps are Haystack and Digicard
 - These allow you to create and share business cards but not resumes
 - Apps that can create resumes only export them. Can't share over NFC

Requirements & Feasibility

Factors Limiting Feasibility

- Lack of Android experience
- Time needed to learn NFC transfer
- Files are stored locally, making it hard to back up
